Summary

I am a passionate and detail-oriented front-end web developer specializing in React.js, with a proven track record of turning creative ideas into seamless, high-performing digital experiences.

Over the years, I've developed a deep understanding of crafting responsive, user-focused websites and applications by combining clean, scalable code with visually appealing designs. My expertise spans a range of modern web technologies, including HIML, CSS, JavaScript, React, TypeScript, Sass, Redux, and beyond.

In my roles, I've had the privilege of collaborating with cross-functional teams, bridging the gap between design and functionality to deliver innovative and scalable web solutions. From building dynamic, component-driven applications from scratch to integrating complex APIs and optimizing performance, | thrive on creating solutions that enhance user engagement and meet business.

goals.

some of my key achievements include leading the development of customer-facing features that drove a 30% increase in user retention, improving site performance by reducing load times through effective optimization techniques, and contributing to large-scale rebranding projects.

with measurable impact on client satisfaction.

What excites me most Is the ever-evolving nature of front-end development. I'm always eager to learn and adapt to the latest tools, frameworks, and best practices ensuring | stay ahead of trends in this fast-paced industry. Whether it's solving a challenging problem, collaborating on a new feature, or optimizing an existing application, i'm all about delivering impactful results. Lets connect and create something extraordinary together!.

Professional Experience

Web Developer, *30NS Connect Inc*   01/2025 – Present
                                                        Ontario, Canada

At 30NS Connect Inc, i am part of a dynamic team that brings client visions to life through innovative and user-focused designs.

My role involves:

- Developing pixel-perfect, responsive websites using HTML, CSS, and JavaScript, ensuring seamless functionality across devices.
- Collaborating closely with designers to deliver fully integrated web solutions that exceeded client expectations.
- Optimizing site performance, improving load times by up to 0% through efficient coding practices and tool implementation.
- Contributing to a major rebranding project for a top-tier client, which increased their online engagement by 30%.
- Working here taught me how to balance creativity with functionality while always keeping the user experience front and center.
- End-to-End Feature Development: Spearheaded the creation of key application features, starting from ideation, prototyping, and development, to rigorous testing and deployment.
- State Management Expertise: Leveraged Redux, Context API, and advanced hooks to manage complex application states, ensuring smooth data flow and responsiveness.
- Optimized Performance: Implemented code-splitting, lazy loading, and memoization techniques to boost application performance and load times.

- Collaborative Problem-Solving: Worked closely with cross-functional teams, including back-end developers, designers, and product managers, to bridge the gap between vision and execution.
- Modern Design Implementation: Translated Figma designs into pixel- perfect interfaces, utilizing CSS frameworks like Tailwind CSS and Styled-Components for scalable and maintainable styling.
- API Integration: Integrated RESTful and GraphQL APIs, ensuring robust and seamless data retrieval while maintaining a strong focus on error handling and edge cases.
- Unit Testing & QA: Ensured code reliability and reduced bugs by writing comprehensive unit and integration tests using Jest and React Testing Library.
- Agile Methodologies: Participated in daily stand-ups, sprint planning, and retrospective meetings to align with team goals and deliverables efficiently.

One of the most rewarding aspects of this role is the opportunity to stay ahead of the curve by exploring cutting-edge tools and libraries in the React ecosystem. i am constantly learning and improving, ensuring that the solutions i provide are not only effective today but also sustainable in the long run.

This experience has solidified my ability to manage remote work dynamics while delivering high-quality, impactful results. Its been an incredible journey that honed both my technical expertise and interpersonal skills, preparing me to take on even greater challenges in the world of front-end development.

Web Developer, *Upwork*   03/2022 – 09/2024
                                                                                                        Remote

As a dedicated Remote React.js Front-End Developer, i had the privilege of contributing to an exceptional team where collaboration, innovation, and problem-solving were at the forefront of every project.

Working remotely taught me the importance of clear communication and self-discipline, and i thrived in this environment, delivering high-quality solutions that exceeded expectations.

My role involved designing and implementing dynamic, responsive, and user-friendly web interfaces using React.js. i took ownership of crafting components with a focus on performance, reusability, and scalability.

From developing intuitive dashboards to interactive user workflows, i was instrumental in shaping seamless experiences for users.

Highlights of my work include:

- End-to-End Feature Development: Spearheaded the creation of key application features, starting from ideation, prototyping, and development, to rigorous testing and deployment.
- State Management Expertise: Leveraged Redux, Context API, and advanced hooks to manage complex application states, ensuring smooth data flow and responsiveness.

Optimized Performance: Implemented code-splitting, lazy loading, and memoization techniques to boost application performance and load times.

Web Developer, *TechForward Solutions*   12/2022 – 02/2024
                                                                                                        USA

At TechForward, i played a key role in building sleek, high-performance web applications using React.js.

My responsibilities included:

- Developing dynamic, responsive user interfaces with React.js, Redux, and modern styling frameworks like TailwindCSS and Material-UI.
- Collaborating with designers and back-end developers to transform complex requirements into functional, pixel-perfect web pages.
- Optimizing component performance and debugging issues, reducing app load time by 35% for a flagship project.

- Leading the development of a customer dashboard feature that improved user engagement by 50% This experience sharpened my ability to create intuitive, high-quality front-end solutions while working in fast-paced, agile environments.

Skills

- HTML & CSS
- Git
- Redux
- Material UI
- Javascript
- MYSQL
- Jira
- Zustand

- React
- Typescript
- Tailwind
- Firebase
- MongoDB
- Bootstrap
- CI/CD
- and much more...
